President, Spencer C. Henderson announces the official launch of West Coast Pedal Board

Bringing American Ingenuity and Manufacturing Back

“Vintage Style & Modern Function”

Windsor, California – February 20, 2013

West Coast Pedal Board announces the official start of business with Custom Shop and Retail products. West Coast Pedal Board manufacturers high quality pedalboard systems in the USA. “Vintage Style, Modern Function” is their complete essence; offering customers the largest spectrum of customizable options with a true custom shop experience. The retail line focuses on the most popular sizes and tolex matching to many popular amplifier models. Players of all levels now have access to guaranteed quality, hand made in the US gear!

West Coast Pedal Board was born from necessity when Spencer had all his pedals spread all over the floor in a state of disorder. Realizing that a generic off the shelf pedalboard wasn't sufficient for most players, a feature rich pedal board custom shop, with numerous customizable options was not only needed, but also required for our industry. West Coast Pedal Board was born.

Amp and Guitar matching is simply one portion of West Coast Pedal Board, and is a very unique niche that will require fulfillment in the ever-expanding fever pitched world of effect pedals. Tolex coverings, exotic and hardwoods, and finishing techniques down to the handle are features of their online Custom Shop Pedal Board builder tool. Hundreds of different user customizable options from different sizes, instrument jacks for quick guitar/amp and FX loops connections, power inputs, toggle switches and indicator lamps assuring power to the board and all devices. Cases for every application: tour ready ATA flight cases, light duty hard cases matched to your pedalboard, plus, high quality soft gig bags.

About West Coast Pedal Board:

Founded in April 2012, West Coast Pedal Board is a USA based and Made in America musical equipment company from Windsor California. Creating pedalboard solutions for all types of players through innovation and constant product development.
